OPENING

Enhancing the Commercial Development of High-Value Training Offers at Fiducial FPSG

1. E-learning, Augmented Reality & Virtual Reality
2. Lenny Lanfrey - MBA Management International Business - MBway Lyon - 2026

FIDUCIAL FPSG

EXECUTIVE ROADMAP

A consulting logic, from issue to recommendation

CORE BUSINESS ISSUE

Innovation exists. Scalability is the issue.

1. Existing high-value offers
2. Uneven sales force appropriation
3. Unclear positioning for some offers
4. Lack of dedicated monitoring

PROBLEM STATEMENT

How can Fiducial FPSG enhance and commercialize its high-value training offers: e-learning, augmented reality and virtual reality for professional clients, considering their commercial development potential?

1. **Strategic issue**
2. **Commercial issue**
3. **Operational issue**

METHODOLOGY

A mixed approach to avoid a purely theoretical answer

1. Literature review
2. Internal diagnosis
3. Existing offers and commercial proposals
4. Four-perspective benchmark
5. Strategic synthesis
6. Recommendations
7. Budget, ROI and risks

BENCHMARK LOGIC

Four perspectives, one commercial question

1. **Apave: direct competitor**
2. **Rockefeller: pedagogical innovation**
3. **OCP: key account client**
4. **Axe Capital: B2B sales strategy**
5. **Criteria: value, barriers, targets, sales tools, lessons**

THREE OFFERS MATURITY SNAPSHOT

Three offers, three commercial maturity levels

1. **E-learning: high-value key account potential**
2. **AR: most accessible short-term lever**
3. **VR: pedagogically relevant but commercially underactivated**

E-LEARNING DIAGNOSIS

High value, but limited internal scalability

1. **Decathlon proposal: EUR 4,500 HT**
2. **Paris La Defense proposal: EUR 5,720 HT**
3. **IBM project: EUR 13,560 HT**
4. **Issue: too dependent on senior sales profiles**

AUGMENTED REALITY DIAGNOSIS

The most mature short-term lever

1. Familiar fire safety need
2. Easy to demonstrate
3. Visual and engaging
4. Strong upsell potential
5. Needs stronger monitoring

VIRTUAL REALITY DIAGNOSIS

Relevant, but commercially underactivated

1. Road risk as professional risk
2. Targets: vehicle fleets, logistics, field teams, mobile employees
3. Issue: unclear positioning
4. Risk: perceived as a gadget

INTERNAL DIAGNOSIS

Assets are real. Commercial system is incomplete.

1. Strengths: innovative portfolio, safety credibility, B2B client base, customized e-learning ability, positive AR feedback

2. Weaknesses: no dedicated objectives, insufficient training, uneven knowledge, limited materials, no KPI dashboard

EXTERNAL DIAGNOSIS

Demand is evolving, but adoption is not automatic

1. **Opportunities: flexible training demand, modernization, upsell, differentiation**
2. **Threats: price sensitivity, resistance to change, face-to-face habits, gadget perception, short-term ROI proof**

BENCHMARK SYNTHESIS

Innovation must become perceived value

1. **Apave: sell operational solutions**
2. **Rockefeller: pedagogical credibility matters**
3. **OCP: key accounts need proof and simplicity**
4. **Axe Capital: value-based selling and sales enablement**

STRATEGIC SYNTHESIS

From innovation availability to commercial scalability

1. Clear value proposition -> Sales force appropriation -> Client understanding -> Adoption -> Commercial performance

TARGET SEGMENTATION

Do not sell everything to everyone

1. E-learning: large accounts, multi-site clients, specific internal processes
2. AR: existing fire safety clients, SMEs, recurring B2B clients
3. VR: vehicle fleets, logistics, field teams, mobile employees

RECOMMENDED POSITIONING

A safety training expert using digital and immersive levers

1. **Fiducial FPSG should not become a technology provider**

2. **It should remain a safety training expert using digital and immersive solutions to improve compliance, prevention and learner engagement**

ACTION PLAN OVERVIEW

Four actions to structure commercial scalability

1 1. Create a clear commercial offer portfolio

2 2. Train salespeople in value-based selling

3 3. Launch a 40-client pilot campaign

4 4. Implement dedicated KPIs and monthly monitoring

RECOMMENDATION 1

Create a clear commercial offer portfolio

1. One sales sheet per offer
2. Target clients
3. Client problem solved
4. Key benefits
5. Price logic
6. Use cases
7. Objections
8. Proof elements

RECOMMENDATION 2

Train salespeople in value-based selling

1. First group of 4 salespeople
2. 1-day session
3. Demonstrations
4. Objection handling
5. Discovery questionnaire
6. Internal training cost = 4 salespeople x 7 hours x loaded hourly cost

RECOMMENDATION 3

Launch a 40-client pilot campaign

1. 40 priority clients
2. Existing portfolio first
3. Segment by offer relevance
4. Targeted email
5. Phone follow-up
6. Demonstrations / pilot sessions
7. Refusal reasons tracked

RECOMMENDATION 4

Install a dedicated KPI dashboard

1. Offers presented
2. Demonstrations
3. Quotes issued
4. Quote value
5. Conversion rate
6. Signed revenue
7. Gross margin
8. Average deal value
9. Client satisfaction
10. Refusal reasons

BUDGET AND 2025 BASELINE

A proportionate commercial structuring investment

1. Commercial offer portfolio: EUR 1,300-2,000
2. Sales team training: EUR 2,000-3,500
3. Targeted pilot campaign: EUR 1,500-2,300
4. KPI dashboard: EUR 0-500
5. Total direct budget: EUR 4,800-8,300
6. 2025 baseline: AR EUR 347,705; e-learning EUR 48,974; VR EUR 5,800; total EUR 402,479
7. Direct budget = approximately 1.2% to 2.1% of 2025 signed revenue

ROI SCENARIOS AND BREAK-EVEN

A cautious ROI framework, not a promised result

1. Conservative +5%: EUR 20,124 additional signed revenue
2. Realistic +10%: EUR 40,248 additional signed revenue
3. Ambitious +20%: EUR 80,496 additional signed revenue
4. Break-even margin: conservative 23.9%-41.2%; realistic 11.9%-20.6%; ambitious 6.0%-10.3%
5. ROI must be calculated on additional gross margin, not only revenue

RISKS, LIMITS AND FINAL RECOMMENDATION

Segment. Enable. Pilot. Measure. Scale.

1. **Risks: sales adoption, price resistance, VR gadget perception, lack of KPI follow-up, lack of time, weak client response**
2. **Limits: price sensitivity, client resistance, adoption not guaranteed, VR repositioning, no definitive ROI without margin data**
3. **Final recommendation: transform existing innovation into structured, measurable and scalable commercial growth drivers**

DETAILED BUDGET TABLE

Direct budget detail

- **Offer portfolio: EUR 1,300-2,000**
- **Sales training: EUR 2,000-3,500**
- **Pilot campaign: EUR 1,500-2,300**
- **KPI dashboard: EUR 0-500**

DETAILED ROI CALCULATION

Break-even logic

- Conservative: 23.9%-41.2%
- Realistic: 11.9%-20.6%
- Ambitious: 6.0%-10.3%

KPI DASHBOARD TEMPLATE

Recommended indicators, not actual results

- Offers presented
- Demonstrations
- Quotes
- Conversion
- Signed revenue
- Gross margin
- Refusal reasons

BENCHMARK DETAILED GRID

Four complementary perspectives

- Apave
- Rockefeller
- OCP
- Axe Capital

POTENTIAL JURY QUESTIONS

Short answers

- Why these actors?
- Is ROI guaranteed?
- Why 40 clients?
- Why not become a tech provider?

OFFER DEFINITIONS

E-learning / AR / VR

- **E-learning: reusable training asset**
- **AR: engaging fire awareness**
- **VR: road risk prevention simulation**

ORAL TIMING PLAN

Target 34-38 minutes

- Opening 5-6 min
- Methodology 3-4 min
- Diagnosis 10-12 min
- Benchmark/synthesis 6-7 min
- Action plan 8-10 min
- Budget/ROI/risks 8-10 min

STATIC BACKUP SUMMARY

Core message

- Fiducial FPSG has innovation
- The priority is commercial structuring
- Segment -> Enable -> Pilot -> Measure -> Scale
